

Philip E. Pearce, M.S.
Clinical Audiologist

Mr. Pearce is a Board Certified Clinical Audiologist with over 30 years of experience. He has been a resident of Lafayette for the past 30 years. With a undergraduate degree from the University of Louisiana at Lafayette in Speech Pathology/Audiology and a Master's degree in Audiology from the University of Southern Mississippi, he offers his clinical experience exclusively to the LaHaye Center for Hearing.

Mr. Pearce works closely with your doctor at LaHaye in offering the most advanced testing of your hearing. A complete profile of your hearing abilities will be gathered within minutes. If a hearing instrument can help you, Mr. Pearce will be able to create a cost-effective hearing solution that dramatically improves your hearing and daily life.

Our patients have asked us for hearing assistance because of...

Trust.

You already have an established relationship with your LaHaye Total Eye Care doctor

Convenience.

Professional services for vision and hearing all within one office

Familiarity.

You see the same friendly faces and receive the high quality of care that you expect of LaHaye Total Eye Care

Your Hearing Solutions from LaHaye Center for Hearing

Dr. Leon "Chip" LaHaye

What you can expect from the Highest Quality Hearing Instruments

- Exceptional clarity
- Natural sound
- Effortless hearing
- Hassle-free listening on the phone
- Ease of hearing in noisy environments
- Modern and discreet design
- Secure custom fit made exclusively for you
- Comfortable enough to wear all day

We have a large selection of digital hearing devices at every price point and the most state of the art testing equipment, and a full time degreed clinical audiologist on staff.

Recognize the onset of hearing loss by asking yourself the following questions:

1. Do you ever experience feelings of dizziness?
2. Do you have ringing or other noises (tinnitus) in your ears?
3. Do others complain that you watch television with the volume too high?
4. Do you frequently have to ask others to repeat themselves?
5. Do you have difficulty following conversations in groups or noisy situations?
6. Do you have to sit up front in meetings or worship services in order to understand the speaker?
7. Do you have difficulty understanding women's or children's voices?
8. Do you have trouble knowing where sounds are coming from?
9. Do you have trouble understanding when someone talks to you from another room or is not looking directly at you?
10. Do others tell you that you don't seem to hear them?
11. Does it often seem like others are mumbling when they talk to you?
12. Do you avoid family meetings or social situations because you cannot understand what people are saying?

If you answered "yes" to any of these questions, ask your doctor how the LaHaye Center for Hearing can help you "Hear Like You Remember".

I am excited to announce the integration of a new division of healthcare at LaHaye Total Eye Care. The LaHaye Center for Hearing is a fully integrated part of the medical care that you receive from our team of doctors.

Our patients asked for this service, and we are proud to offer it to you and your loved ones.

We look forward to helping you to "Hear like you remember".

Leon C. LaHaye MD
